Election/Restrictions

Applicant's election with traverse of Group 1 Claims 1-6 in the reply filed on 4/19/06 is acknowledged. The traversal is on the ground(s) that it would not put an undue burden on the Examiner to search another class/subclass in the art. This is not found persuasive because searching a separate class/subclass, one related to a composition and one related to a method of coating an article is an undue burden to the Examiner.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Art Unit: 1712

1. Claims 1 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over O'Keefe (US 6184311) in view of Decker (US 6025030).

The rejection is as put forth in the previous office action. Both teach polyester powder coating compositions. Applicant argues the two references can not be properly combined because Decker teaches the semi-crystalline polyester to be adducted to a curing agent, and nothing therein suggests the desirability of stopping the formation of the adduct in the final composition. Examiner uses Decker solely to teach the use of 10 wt% asymmetrically substituted polyacid. Decker teaches the desired flexibility of the coating can be obtained by using said polyacids (Column 4 Lines 13-24). Thus the rejection is deemed proper.

2. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over O'Keefe and Decker in view of Pietila et al (Ahjopalo) (Polymer, 41, 2002, 8283).

This rejection is as put forth in the previous office action. Applicant argues Ahjopalo fails to establish that any specific polyol or reactant combination leads to a non-blooming polyester. Examiner uses Ahjopalo to teach the inclusion of non-blooming agents to polyester resins in order to decrease cyclic oligomers. See abstract. Cyclic dimers of TPA are known to bloom (pg 1 right side), and Ahjopalo finds the use of BEPD with TPA to decrease the formation of these cyclic structures. Thus the rejection is deemed proper.

3. Claims 5 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over O'Keefe and Decker in view of Daly (US 6294610).

This rejection is as put forth in the previous office action. Applicant argues that Daly fails to make up for the deficiencies of Decker and O'Keefe. This has been addressed above. Thus the rejection is deemed proper.

Response to Arguments

4. Applicant's arguments filed 8/30/06 have been fully considered but they are not persuasive. See above rejections.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

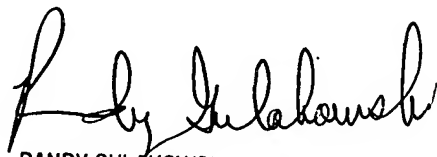

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
